

## Contents

Chapter 1.	Introduction.....	1
Chapter 2.	Objectives.....	9
Chapter 3.	Materials and Method.....	10
	3.1 Sampling sites information.....	10
	3.2 Meteorological data.....	10
	3.3 Sample collection.....	14
	3.4 Analytical procedure.....	14
	3.5 Calculation of particulate and metal concentrations.....	16
	3.6 Quality control.....	21
	3.7 Pollution source identification.....	23
Chapter 4.	Results and Discussion.....	25
	4.1 Total suspended particulate concentration.....	25
	4.2 Metal concentration.....	36
	4.3 Statistic analysis.....	47
	4.4 Model analysis.....	51
Chapter 5.	Conclusions and Suggestions.....	56
	5.1 Conclusions.....	56
	5.2 Suggestions.....	57
Chapter 6.	References.....	58
Appendix A.	Metal Calibration Curve	
Appendix B.	Metal concentration of the sampling program	
Appendix C.	The parameters for TAPM and Gaussian dispersion models	
Appendix D.	其他單位分析結果；平行分析比對結果	

## List of Figures

Figure 1-1. The glass producing process.....	8
Figure 1-2. The arsine treatment process.....	8
Figure 3-1. The sampling site of this study during winter season, i.e., NE bound wind case.....	9
Figure 3-2. The apparel of TE-1000 Poly-Urethane-Foam High Volume Air Sampler (General Metal Work, USA).....	17
Figure 3-3. The auto-digital hot plate.....	19
Figure 3-4. The Polarized-Zeeman Atomic Absorption Spectrophotometer (Z-5000, HITACHI, Japan).....	20
Figure 4-1. The average annual TSP ( $\mu\text{g}/\text{m}^3$ ) of Taichung City between 2000 and 2004 compared to this study and Tsai's report.....	27
Figure 4-2. The comparison of the average monthly TSP ( $\mu\text{g}/\text{m}^3$ ) between this study and the previous data (2000 to 2006) (Tsai's report, 2006).....	28
Figure 4-3. The TSP profiles during sampling period from December 2005 to February 2007 at Taya, THU and LTGA sites.....	29
Figure 4-4. The comparison of the tendency between TSP ( $\mu\text{g}/\text{m}^3$ ) and the wind speed (m/s) at all sampling sites (Taya, THU and LTGA).....	33
Figure 4-5. The comparison of each sampling site for every monthly (Dec. 2005 to Feb. 2007) arsenic concentration ( $\text{ng}/\text{m}^3$ ) in total suspended particulate (TSP).....	41
Figure 4-6. The tendency of arsenic concentrations ( $\text{ng}/\text{m}^3$ ) based on wind speed (m/s) during sampling period (Dec. 2005 to Feb. 2007) at all sampling sites.....	42
Figure 4-7. The As concentrations ( $\text{ng}/\text{m}^3$ ) based on wind direction at all sampling sites.....	43

Figure 4-8. The tendency of As concentration ( $\text{ng}/\text{m}^3$ ) based on the TSP ( $\mu\text{g}/\text{m}^3$ ) concentration at all sampling sites.....	44
Figure 4-9. The sampling sites for the comprehensive sampling program Jan. 12 and Jan. 31 2007.....	46
Figure 4-10. The factor analysis of metallic elements in total suspended particles at Taya, THU and LTGA site.....	50
Figure 4-11. The simulation air parcel trajectory by TAPM at TA site (Feb. 01. 2006).....	54
Figure 4-12. The contour map for arsenic pollutant at this area.....	55

List of Tables

Table 1-1.	The emission standard for semiconductor manufacture in Taiwan.....	7
Table 3-1.	The meteorological information, which is collected from the Taiwan Central Weather Bureau and the Environmental Protection Administration Executive Yuan, R.O.C, includes the sampling date's temperature, relative humidity, prevailing wind direction and wind speed.....	12
Table 3-2.	The flow chart of metal analyses in TSP.....	18
Table 3-3.	Method detection limit (MDL) of each metal concentration by using the Polarized-Zeeman Atomic Absorption Spectrophotometer.....	22
Table 4-1.	The yearly death toll of respiratory diseases in Taichung City comparing between total suspended particulate ( $\mu\text{g}/\text{m}^3$ ).....	35
Table 4-2.	The metal concentration ( $\text{ng}/\text{m}^3$ ) comparison of total suspended particulate (TSP) obtained by this study and other researches.....	39
Table 4-3.	As concentrations ( $\text{ng}/\text{m}^3$ ) at all sampling sites for the comprehensive sampling programs.....	46
Table 4-4.	The correlation coefficients of TSP and arsenic concentrations and meteorological parameters at all sampling sites.....	49
Table 4-5.	The high level concentrations and the simulated results of metal elements at THU site during the NE wind direction and the Tang-An building site date at Feb. 01. 2007.....	53
Table 4-6.	The verification of Gaussian dispersion model in the NE direction wind seasons (2005 to 2007).....	53
