

表目錄

Table 4.1. Major elements of raw RH and RHA detected by XRF.....	4-3
Table 4.2. Moisture, ash, and combustibles contents and solid pH of raw RH and RHA.....	4-3
Table 4.3. BET surface areas of raw RH and RHA.....	4-3
Table 4.4. Comparison with BET surface areas of adsorbents for rice husk at different Process.....	4-4
Table 4.5. Elements contents of raw RH and RHA.....	4-5
Table 4.6. Characteristics of the nickel-containing plating wastewater.....	4-7
Table 4.7. Comparison of adsorption modelling result using Freundlich isotherm..	4-13
Table 4.8. Comparison of adsorption modelling result using Langmuir isotherm...	4-13
Table 4.9. Some organic functional groups identified by previous studies using FT-IR.....	4-16
Table 4.10. Langmuir adsorption isotherms for nickel-sorbing RH and RHA samples.....	4-20
Table 4.11. Freundlich adsorption isotherms for nickel-sorbing RH and RHA samples.....	4-20
Table 4.12. Structural parameters of the RH and RHA samples that sorb nickel from 2000 mg/L Ni (II) solution for 0.5, 12 and 24h.....	4-28
Table 4.13. Structural parameters of the RH and RHA samples that sorb nickel from plating wastewater for 0.5, 12 and 24 h.....	4-36.
Table 4.14. BET surface area of raw RH and Ni (NiSO ₄)-containing RH samples after heating at different temperatures.....	4-43
Table 4.15. Solid pH value of raw RH and Ni (NiSO ₄)-containing RH samples after heating at different temperatures.....	4-43

Table 4.16. XRD-detectable species of Ni (NiSO ₄)-containing RH samples afterheating at different temperatures.....	4-45
Table 4.17. Structural parameters of NiO reference and Ni (NiSO ₄)- containing RH samples after heating at different temperatures.....	4-50
Table 4.18. BET surface area of raw RH and Ni (plating)-containing RH samples after heating at different temperatures.....	4-54
Table 4.19. Solid pH value of raw RH and Ni (plating)-containing RH samples after heating at different temperatures.....	4-54
Table 4.20. XRD-detectable species of Ni (plating)-containing RH samples after heating at different temperatures.....	4-55
Table 4.21. Structural parameters of NiO reference and Ni (plating)-containing RH samples after heating at different temperatures.....	4-59
